Improvements that can be made throughout the development:

1. Overall Design
2. Make design responsive on all viewports
3. Scan QR Code to send payment
4. Remember User
5. Security (Add PIN per wallet)
6. Ability to recharge wallet

Hidden Features (Can be Enabled by adjusting environment variables:

1. Send Money – Add or Set ENABLE_SEND_MONEY = true
2. Request payment – Add or Set ENABLE_REQUEST_PAYMENT = true

Clarifications/justifications:

1. Wallet Address is used in Sending money and somewhat related in Request Payment
2. Wallet Name must be unique in user's wallets
3. User A's wallet and User B's wallet can have the same name.
4. You cannot send money if the requested amount is higher than your current balance (Total Incoming – Total Outgoing)
